**CHRYSO®Quad 20** Viscosity modifying admixture 05/12/2024

**`** <del>(</del>

#### DESCRIPTION

CHRYSO®Quad 20 unique formulation increases the viscosity of cement paste with limited impact on concrete slump / slump flow. As a result, concrete using CHRYSO®Quad 20 are significantly less sensitive to water or fine content inconsistency.

CHRYSO®Quad 20 is generally used in combination with a high range water reducer.

It does not contain any chloride. Its exclusive formulation is userfriendly.

#### **BENEFITS**

- With the use of CHRYSO®Quad 20, rheological properties of concrete are significantly more consistent. It help prevents segregation, bleeding and honeycombing.
- CHRYSO®Quad 20 is recommended for all high flowability concrete mixes such as SCC where superior robustness to bleeding & segregation while maintaining excellent placeability is desired.

#### PACKAGING

- 210 L drum
- IBC 1000L

#### **FIELDS OF APPLICATION**

CHRYSO®Quad 20 is recommended for all concrete mixes where improved concrete performance, consistent rheological concrete properties and superior robustness characteristics are desirable.

- All cement types
- Precast
- Architectural concrete
- Cement screed
- Ready-mix concrete
- Extended workability retention
- Pumped concrete
- Self levelling concrete
- etc

P.1/2

# CHRYSO®Quad 20

Viscosity modifying admixture

## INDICATIVE INFORMATION

Product Nature	liquid
Color	Light yellow
Lifetime	12 months
Halogen Dry Extract	1,05 % ± 0,10
CI <sup>-</sup> lons content	≤ 0,100 %
Equivalent Content NA <sub>2</sub> O	≤ 1,00 %
Specific gravity	1,000 ± 0,020
рН	9,00 ± 2,50

Cl<sup>-</sup> ion content: nil to EN 934 and BS 5075.

## METHOD OF USE

- A 0.4% dosage of the product of the weight of cement is commonly used.
- This product must be added to the mixing water or at the end of the mixing cycle.
- The optimum dosage of this product can only be established after trial tests, taking into account the rheological characteristics and the required mechanical performances of the concrete.
- Water content must be determined according to the workability & compressive strengths required.
- From 0.2 to 1.0 kg per 100 kg of cement.

## PRECAUTIONS

- Protect from frost.
- Should the product freeze, it will recover its properties. After thawing, an efficient agitation is necessary until the product is entirely homogeneous again.
- Use at a temperature above 0° C.

#### Compatibility:

- CHRYSO<sup>®</sup>Quad 20 is compatible with all types of Portland cement, class C and F fly ash, GGBS, microsilica, fibers and approved air entraining admixtures.
- CHRYSO<sup>®</sup>Quad 20 can be used in combination with a high range water reducer of the range CHRYSO<sup>®</sup>Optima or CHRYSO<sup>®</sup>Premia.

## NORMATIVE AND REGULATORY INFORMATION

• This product conforms to CE marking. The appropriate declaration can be found on our internet site.

## SAFETY

**CHRYSO®Quad 20** is not considered dangerous to handle. Prior to any use, please read carefully the Material Safety Data Sheets.

The information contained in this document is given to the best of our knowledge and is the result of extensive and controlled testing. However, it cannot under any circumstances be considered as a warranty involving our liability in the case of misuse. Tests should be con ducted before the product is used to ensure that the methods and conditions of use of the product are satisfactory. Our specialists remain at the disposal of customers if they require help with the application of the product for their specific needs. www.chrysogulf.com CHRYSO Gulf LLC, P.O.
